Admixture polycarboxylate superplasticizer powder for mortar

Admixture polycarboxylate superplasticizer powder for mortar is a new generation of environment friendly cement admixture of advanced world level, mainly as effective dispersant, fluidized and high range water reducing concrete agent. It can be widely used in water conservancy project, electrical power project, port project, railway project, bridge project, highway project and main structure cement casting of civil building.

Application:

It is a special Admixture polycarboxylate superplasticizer powder for mortar. It has a good adaptability with cement and other admixtures have been widely used in non-shrinkage grouting material/ mechanical grouting material, repair mortar, cement-based mortar, waterproof mortar, crack-sealer ND thermal mortar, and other cement-based dry powder material. It has been proved to be very helpful in improving the fluidity, early and final strength and the decreasing the shrinkage crack at

the last stage of the mortar hardens. Besides, the product is applicable to the gypsum-based dry powder material, fire-proof material and ceramics.

Index

Item	Unit	Standard
Appearance	/	White or light yellow powder
Density	kg/m ³	500±50
pH (23℃)	/	6.0±1.0
Solid Content	%	97.0±1.0
Moisture content	%	≤3.0
Water Reducing Ratio	%	≥25
Cl ⁻	%	≤0.02
Alkali content	%	≤0.3

Polycarboxylate water reducer product advantages

1. Good compatibility with various cements, good maintenance performance of concrete slump and extended concrete construction time.
2. Low dose, high water reduction rate and low shrinkage rate.
- 3, significantly improve the early concrete, strength.
4. The product has low chloride ion content.Low alkali content is beneficial to the durability of concrete.
5. This product has no pollution and conforms to ISO14000 environmental protection management standard.It's a green product.
6. Use polycarboxylic acid water reducer to replace cement containing more slag or fly ash to reduce the cost.
