ready mix concrete admixtures

Product Introduction:

ready mix concrete admixtures can significantly improve the fluid plasticity and workability of concrete.

This series of products have the characteristics of simple production process, low energy consumption, formaldehyde free, green environmental protection, etc., including high water reduction rate, slump resistance, retarding, early strength, antifreeze and other functional formulations.

Its uniformity, working performance and concrete index can reach or exceed relevant standards.

performance

1. ready mix concrete admixtures can significantly improve the fluid plasticity and workability of concrete.

This series of products have the characteristics of simple production process, low energy consumption, formaldehyde free, green

environmental protection, etc., including high water reduction rate, slump resistance, retarding, early strength, antifreeze and other functional formulations.

Its uniformity, working performance and concrete index can reach or exceed relevant standards.

Uses

1.The use of additives and other additives must be determined by testing.

Mixer and transport vehicles must be cleaned before use, otherwise the effect will be affected.

2.This product should be added with mixed water.

Don't put it directly into the polymer.

3. In addition, please carry out the construction according to the technical specification for application of concrete admixtures.
