Synthetic polycarboxylate superplasticizer

Product Introduction:

Synthetic polycarboxylate superplasticizer can obviously improve the fluid plasticization performance and workability of concrete.This series of Synthetic polycarboxylate superplasticizer has simple production process, low energy consumption, no formaldehyde, green environmental protection, including high water reduction, slump protection, retarding, early strength, anti-freezing and other different functions of the formula.Its evenness and workability and concrete indexes can meet or exceed the relevant standards.

Usage:

1, Synthetic polycarboxylate superplasticizer can be used alone, can also be used as mother liquor and other functional admixtures combined to make a series of retarders, early strength and frost resistance properties of admixtures.

2. The recommended dosage is 0.15~2.s0% of the total amount of cementing materials, and the specific dosage depends on the actual situation.It is recommended to conduct adaptability tests before secondary use.

3. Polycarboxylic acid superplasticizer can be added directly to the concrete mixer or diluted with a small amount of water before being added to the concrete mixer.Mixed methods work better when used.

RFQ

1. How can you guarantee the quality of your water reducer?

A::If you can become a customer, the company can provide free samples for testing.

Also, prior to delivery, each batch of product will be rigorously tested and the retained samples will be kept in our inventory to track changes in product quality.

Customers with a first order and a minimum order customer are advised to perform a simple lab

2.What other services can you provide in addition to the product?

A::We have a wide range of concrete additives and we have extensive experience in the production of water reducing agents. We not only provide customers with additives, but also provide guidance on how to use them, as well as indication formulas for different types of mortar.

Technical guidance for concrete admixtures and some samples

There is also technical support that can be quickly resolved.
